ROAD MAP

SEPTEMBER 2018 - SEPTEMBER 2019

JANUARY 2019 | B2B EVENT

MARCH 2019 | B2B EVENT

MARCH 2019 | 22. 3. | B2B EVENT

CO-ORGANIZED

SEPTEMBER 2019 | B2C EVENT
INNOVATION - human creativity, new ways of problem solution are changing our world even in this very moment. Constant change of the new world replacing the old one is clearly seen all around us. This transformation is accompanied by great enthusiasm but even some emerging issues. Right these two aspects of innovation are central to our concerns and the reason of our intention to lead the group of people together.

The enthusiasm stems from the new possibilities for people to live their lives more intensely, fulfil themselves, to be successful. On the other side, the process of extinction of the old is not the matter of day to day process. It fulfils its role for a long time on. Searching for a non-violent and natural development is what we consider the most important. We suggest the solution consisting of prevention of conflict by balanced dialogue.

And this gave rise to the TechSummit Events: enthusiasm about the new ideas and creation of dialogue on adaptation of the innovations into the already existing system.

The TechSummit Events is independent commercial platform interconnecting all parties interested in sharing enthusiasm over innovations and creating dialogue for its application.

We organize conferences on innovation in the following areas:

Health, health service - health.techsummit
Shared and collaborative economy - share.techsummit
Technologies, internet, Smart Cities, 4.0 industrial revolution, cyber security, artificial intelligence, gadgets - techsummit
Start-ups, B2B trade - startup.techsummit
3D technologies - 3dworld.techsummit
Games, fun, education - funtech
City, development, community, solidarity - urbansummit
Financial technologies, Blockchain, cryptocurrencies - fin.techsummit
Our TechSummits are the places for meetings for all concerned parties:

**Innovators** - leaders, visionaries, and projects promoters, creatives. Those who create innovation.

**The companies** - those bring innovations into our everyday reality. On the other hand, even the companies from different competitive environment that are touched by the course of trade which is significantly changed or even jeopardized by the innovation.

**State and the legislators** - those who are settling the trade rules and are willing to search for the best solution for all concerned.

**Municipalities** - such state local authorities’ representatives.

**Enthusiasts** - pioneers and disseminator of the creative ideas who are responsible for spreading of the innovation among people.

This networking represents us the perfect picture of something new arising from the meetings of many mutually unknown parties. This is the idea of the TechSummit Events.

GENIUS LOCI TechSummit - the atmosphere of our conferences is expressed by the topic, people and activities.

Our topic is the pace of rapidly changing world with all its challenges and issues. We are drawing our curiosity to the human activity which is for now marginalized, but will be soon at the very centre.

Our guests are innovators who are engaged in inspiring, recommending and cooperating with others for higher purposes. Not only speakers are the important ones at our conferences, but everyone, because of the potential of inspiration and cooperation which everyone brings here.

To fulfil our aim, to inspire you with the new partners and ideas, we are providing you the balanced program with active listening, mutual dialogues and the touching spirit of innovation.

The sense and pleasure of the TechSummit Events is the moment when the meeting is transformed to the cooperation, relationship, to the exchange and trade.
